

Service Cloud Case Management Board (LWC + Apex)

Overview:

A dynamic drag-and-drop Lightning Web Component for managing Salesforce Cases by status. Designed to work seamlessly on **Contact** and **Account** record pages in **Service Cloud**.

Key Features:

-  **Drag & Drop** Cases across stages (New, Working, Escalated, Closed)
-  **Real-time status updates** via Apex
-  **Dynamic filtering** based on current record (Contact or Account)
-  Built with **SLDS** for a responsive and professional UI

Tech Stack:

LWC • Apex • SLDS • Lightning Record Page
