

File Management Automation for Salesforce CRM

Overview

Automated the transfer of all related files from a Closed Won **Opportunity** to its parent **Account** using a Salesforce **record-triggered Flow**. This ensures key documents stay accessible at the Account level without manual effort, improving collaboration and data consistency across teams.

Key Features

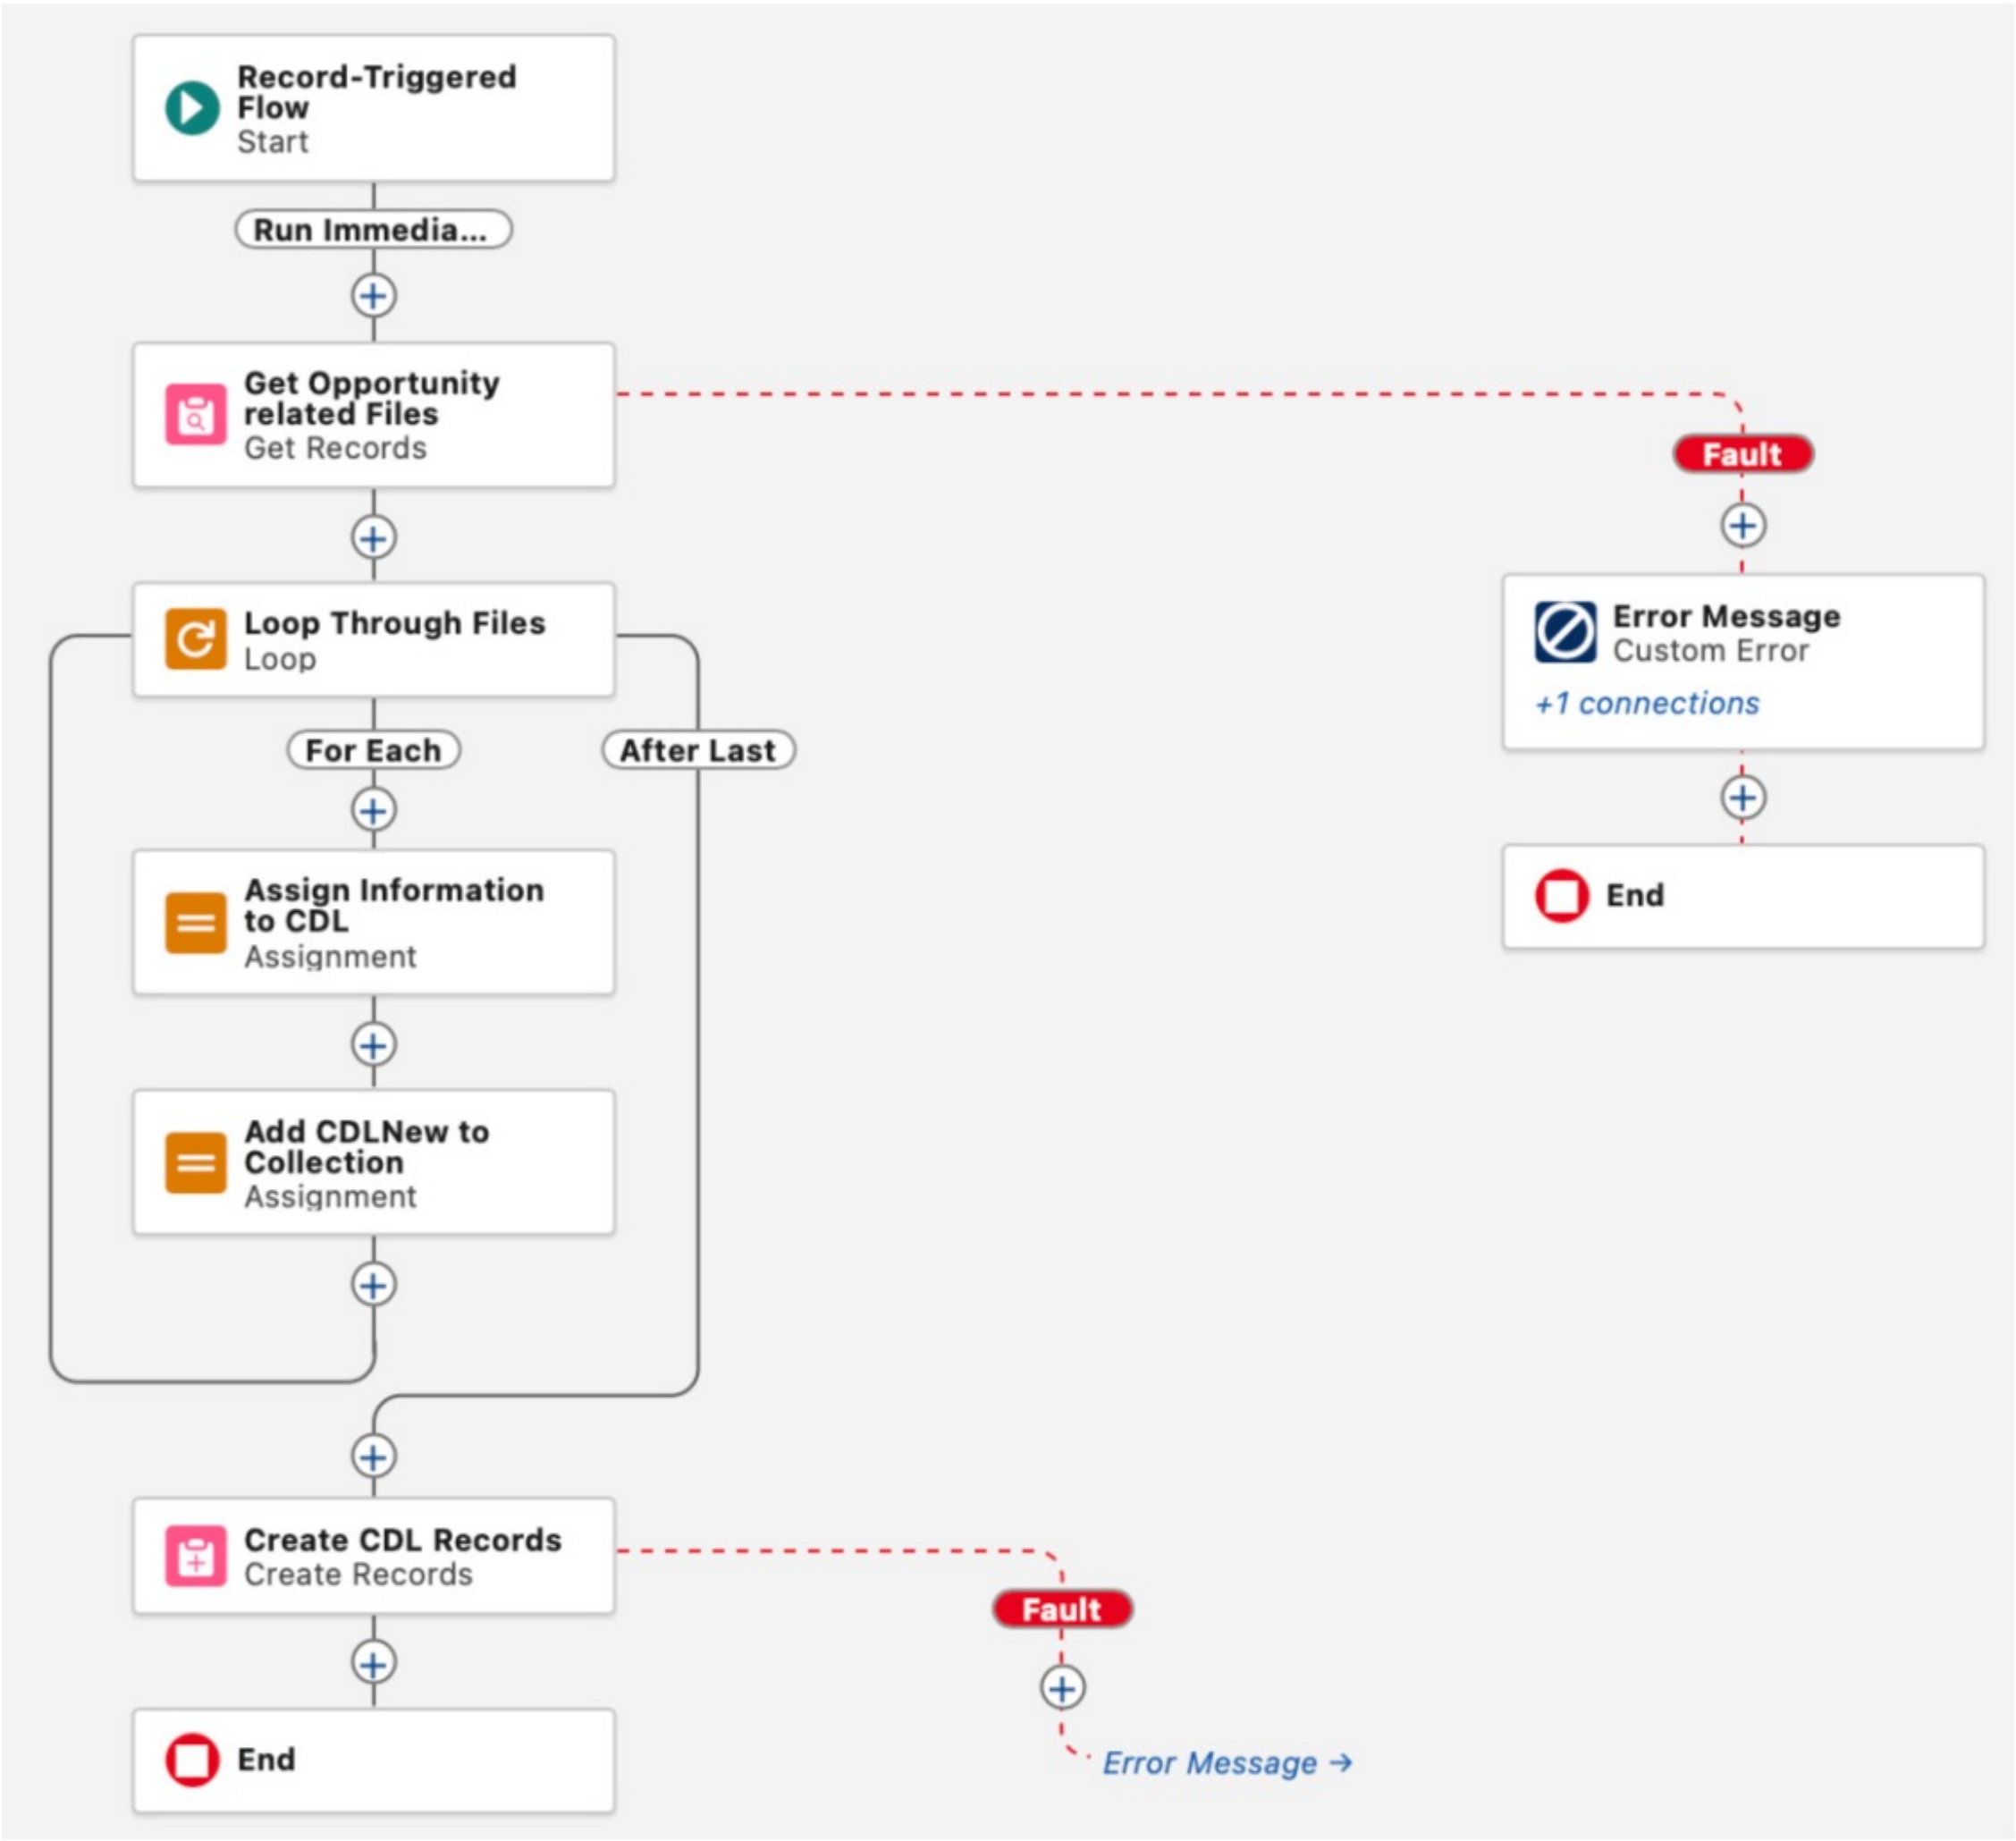

- **Automatic File Copy** – Moves attached files from Opportunity to Account upon Closed Won stage.
- **ContentDocumentLink Handling** – Uses collections and loops to create new links without duplication.
- **Fault Handling** – Custom error block provides user-friendly messages on record pages and optional admin notifications.
- **Real-Time Trigger** – Executes instantly when an Opportunity is updated.
- **Duplicate Check** - Prevents redundant links.
- **Notification Ready** – Easily extendable to send Slack, email, or Chatter alerts.

Tech Stack / Tools

- **Salesforce Flows** (Record-Triggered, Get Records, Loops, Assignments, Create Records)
- **ContentDocumentLink** object for file associations
- **Custom Error Message** for fault handling
- **Email Alerts or Notifications** (optional extension)
- **Salesforce Lightning Experience** for testing and deployment
