

Cadence Creator for Salesforce

Overview

The **Cadence Creator for Salesforce** is a custom **Lightning Web Component (LWC) with Apex backend** that automates the creation of **follow-up task cadences** for leads, contacts, opportunities, and accounts.

It empowers sales and service teams to define structured follow-up sequences (calls, emails, reminders) based on configurable intervals, business hours, and owner assignments, eliminating manual scheduling and ensuring consistent customer engagement.

Key Features

- **Record-Level Automation:** Launch cadence creation directly from Lead, Contact, or Account record pages.
- **Customizable Task Types:** Supports different follow-up types (Email, Call).
- **Dynamic Scheduling:** Generate multiple tasks across custom intervals (daily, weekly, etc.).
- **Business Hours Awareness:** Option to align tasks with standard working hours.
- **Reminder Management:** Configure reminders (same day or previous day) with smart default times.
- **Cadence Tracking:** Auto-label tasks with cadence step numbers (e.g., “Step 2 of 5 – Call”).
- **Owner Assignment:** Search and assign any Salesforce user as the task owner.
- **Scalable & Reusable:** Easily extended for other activity types.

Tech Stack / Tools

- **Salesforce Platform**
 - Apex (server-side logic for cadence generation & business hours calculation)
 - Lightning Web Components (UI input forms, real-time validation, comboboxes, lookup search)
 - SOQL / Database Query
- **UI/UX**
 - Lightning Design System (SLDS)
 - Lookup components, combobox, time/date pickers
- **Deployment / Metadata**
 - Salesforce Metadata API
 - XML Lightning Component Bundle

Skills Highlighted

- **Apex Development:** Bulkified task creation logic, error handling, SOQL queries, reminder scheduling.
- **Lightning Web Components (LWC):** Interactive UI with reactive state, dynamic inputs, and validation.
- **Declarative + Programmatic Integration:** Combined standard BusinessHours API with custom cadence logic.
- **User Experience Design:** Built a clean, record-level interface with contextual visibility (conditional reminder options).
- **Salesforce Task Management:** Automated creation of follow-up tasks aligned with CRM best practices.
- **Problem Solving:** Eliminated manual task scheduling through automation, improving consistency and productivity.
